

Lazerfun

FUN PARK

📍 Werdenbergerstraße 53, 6700 Bludenz

A modern, physical and action-packed “cops and robbers” game.

Lazerfun is a trendy and fun sport that involves collecting electronic points. In contrast to video games, which are usually played sitting down and alone from home, Lazerfun is all about being the character in the game. The focus is on fun, sport and playing in a group.

Each player is equipped with a phaser and has to compete against the other players in a team or alone. Each team is given its own color to distinguish them. The game is played in a futuristic game maze accompanied by groovy music, in which there are many hiding places for the players. Visible laser beams are emitted by the phaser. This is aimed at the players' sensor vests, on which there are 4 different dots. Points are collected and the team with the most points wins (evaluation on the screen in Strike and by printout).

The game is generally suitable for up to 15 players and is even more fun with lots of people (depending on the number of “phasers”, more people may be able to play).

Over 20 different game modes: Gladiator, Capture the Flag, Agents, Zombie...

Duration per game: approx. 12 min pure action playing time, approx. 15 min with introduction (20 minutes per game)
